Hon. J. W. Estey, K.C.,

Minister of Education,

Legislative Bldg., Regina, Sask.

SIR:

I beg to submit the following report of the business of The Saskatchewan Power Commission for the year ended December 31, 1938, and attach hereto the financial statement in the form approved by the Treasury Board.

The Commission owns and operates generating plants located at Saskatoon, North Battleford, Swift Current, Tisdale, Wynyard, Humboldt, Nokomis, Watrous, Maple Creek, Unity, Canora, Leader, Shellbrook, Lanigan and Willow Bunch. The first two plants mentioned are steam plants, while the others listed are equipped with Diesel engines. These plants have an installed capacity of 29,400 k.w.

The Commission owns and operates 1,430 miles of transmission line, chiefly 13,200 volts, and the distribution systems in some 129 towns and villages. A plan is attached showing the location of plants and transmission lines comprising the system.

These above mentioned plants are the main source of supply of electrical energy required to serve the towns and villages in the system, but in some instances a quantity of energy is purchased from other sources. During the year the total energy generated at Commission plants was 49,435,169 k.w.h., and the total quantity purchased was 1,954,995 k.w.h. The cities of Saskatoon, North Battleford and Swift Current and the town of Battleford own and operate their distribution systems, purchasing power supply in bulk from the Commission.

During the year 42 miles were added to the transmission system, being extensions from Nipawin to White Fox, Nokomis to Lanigan and Riverhurst to the city of Moose Jaw pumping station at the Saskatchewan river. Work in progress to convert the line from Moose Jaw to the river near Riverhurst from 13,200 to 33,000 volts will be completed early in 1939. The plant at Watrous is in course of enlargement to serve the broadcasting station of the Canadian Broadcasting Corporation being erected at Watrous. The distribution system at Maple Creek was rebuilt, and sundry renewals and extensions to distribution systems at other points were undertaken. Plans and specifications have been prepared for a new boiler unit at the Saskatoon plant, which it is proposed to instal in 1939.

The Commission has on record a number of applications for line extensions, several of which are warranted as soon as the necessary capital advances can be secured for construction.

In August, 1938, the Commission entered into a ten year agreement, with provision for renewal, with the National Light & Power Company, Limited, under which the company will operate and maintain the portion of the Commission's system between Moose Jaw and Riverhurst. The object of this agreement is to enable the company to supply power to the pumping station of the city of Moose Jaw at the Saskatchewan river near Riverhurst at a favourable rate, without involving any additional cost to the commission or to the towns and villages on the portion of the Commission's system affected.

OPERATION

The financial statement sets out particulars of the balance sheet and operating accounts for the year and shows a net loss of \$570.20, after providing for operating costs, interest charges in full on account of capital invested and debentures assumed and for depreciation and replacement reserves of \$134,435.07.

The total revenue was \$1,173,620.72, operating costs were \$665,172.05, leaving an operating profit of \$508,448.67 available for interest charges, depreciation and replacement reserves.

The revenue for the year, exclusive of Saskatoon, North Battleford and Swift Current was \$541,691.00, being an increase of \$17,398.00 for the year over 1937 revenue.

Provision has been made for depreciation and replacement reserve of \$134,435.57, bringing the total provision to date for such reserves, including debentures redeemed, to \$2,127,370.35. Fixed capital is shown as \$7,765,571.43.

Full maintenance provision was made throughout the properties and continuous service given with a minimum of interruption. No major operating problems were encountered.

THE ELECTRICAL INSPECTION AND LICENSING ACT

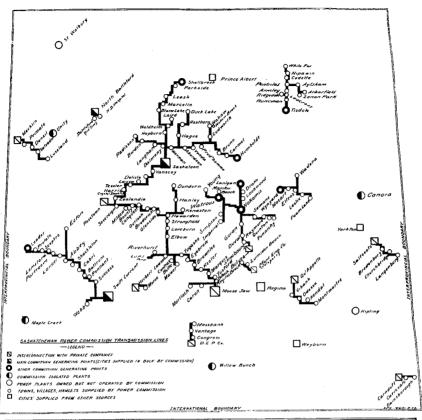

This Act regulates the class of electric wiring to be installed throughout the province. It provides for the inspection of all electrical wiring work by the inspection staff employed by the Commission. The Commission licenses supply houses, contractors and journeymen electricians operating in the province.

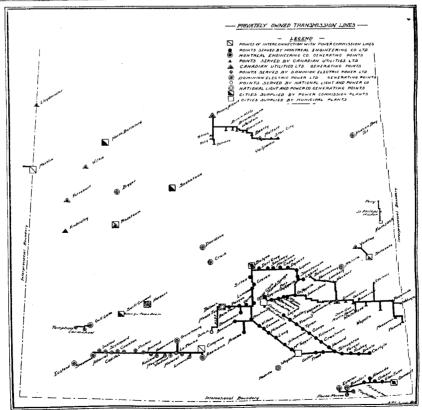

During 1938 the number of inspections made was 9,347. The licenses issued were contractors' licenses 76, contractors' limited licenses 225, journeymen's licenses 141, electricians' licenses 56 and supply house licenses 9.

The financial statement includes particulars of receipts and expenditures relative to this inspection service.

Respectfully submitted,

L. A. THORNTON, Chairman.
